

Award Winning Manuscripts

The University of Toronto Medical Journal (UTMJ) was established in 1923 and is Canada's oldest student run medical journal. We strive to uphold the UTMJ's legacy of excellence by publishing interesting and timely research articles for our esteemed readers. Medical trainees continue to be important contributors to many of the research articles published by the UTMJ. We recognize the value in student research and are proud to serve as an outlet for this work. The UTMJ recently established three awards to acknowledge outstanding submissions from medical trainees in each of our issues. We would like to congratulate the following award winners for the current issue on Artificial Intelligence in Healthcare:

First Prize

Prediction of spontaneous preterm birth among twin gestations using machine learning and texture analysis of cervical ultrasound images

Sandra Fiset, Anne Martel, Phyllis Glanc, Jon Barrett and Nir Melamed

Second Prize

Artificial intelligence in neurosurgery

Anton Fomenko and Andres Lozano

Third Prize

Utilizing convolutional neural networks to detect skin cancer: A review of initial trials

Matthew Ladda and Trevor Champagne

These awards would not be possible without the continued support of the University of Toronto Medical Society and generous donations from our readers. Please consider supporting the UTMJ so that we can further our efforts to promote student research, publish impactful articles and grow our readership. Donations can be made online through our website, www.utmj.org, or sent to the following address: University of Toronto Medical Journal, 1 King's College Circle, Room 2260, Toronto, ON, Canada, M5S 1A8. You can also subscribe to the UTMJ to have print copies of our issues mailed to you.
